

Directions for connecting school laptop to home Wi-Fi

- ❖ BEFORE you log in, click on the Wi-Fi symbol in the bottom right of your screen.
- ❖ Click on the name of your home Wi-Fi connection, or hotspot, and enter your Wi-Fi password.
- ❖ You must do this prior to logging in, or you won't have access to the Wi-Fi settings.

Note: You should then be able to log into the computer using your username and password just as you do at school. Once connected to Wi-Fi and logged in, you should be able to access the Internet and get to Canvas, etc. However, your school network drives will not be available away from the school network unless you also log into your VPN connection. Follow the directions below to access your H drive.

Directions for connecting to your H drive from home:

- ❖ Double click on the blue and white shield icon labeled FortiClient VPN.
- ❖ Make sure the VPN name says Mead Public Schools.
- ❖ Type in your username – same as your computer login
- ❖ Type in your password – same as your computer password
- ❖ Click connect.
- ❖ Once the laptop connects, you will be able to open files on your H drive.
